

## IN THE CLAIMS

Claim 1 (currently amended): A dart board cabinet comprising:  
a cabinet body for supporting at least one dart board, ~~and~~  
an attaching device attached to said cabinet body,  
a housing and rotatably and adjustably attached to said  
attaching device, to allow said housing to be rotated and adjusted  
relative to said attaching device, and

at least one reference line generating device attached to said  
~~cabinet body to generate at least one reference line as a toe line~~  
housing, said at least one reference line generating device including  
a light generating device to generate at least one toe line for said at  
least one dart board, said at least one reference line generating  
device being rotatable in concert with said housing, to allow said at  
least one toe line generated by said light generating device to be  
rotated and adjusted relative to said attaching device and said at  
least one dart board.

Claims 2, 3 (canceled).

Claim 4 (currently amended): The dart board cabinet as  
claimed in claim ~~3~~ 1, wherein said at least one reference line  
generating device includes a circuit board received in said housing,  
and said light generating device is attached to said circuit board.

Claim 5 (currently amended): The dart board cabinet as  
claimed in claim ~~3~~ 1, wherein said housing includes a casing having

a bore formed therein to receive said light generating device.

Claim 6 (original): The dart board cabinet as claimed in claim 5, wherein said at least one reference line generating device includes a lens received in said casing and disposed in front of said light generating device.

Claim 7 (original): The dart board cabinet as claimed in claim 6, wherein said casing includes a passage formed therein and communicating with said bore thereof to receive said lens therein.

Claim 8 (canceled).

Claim 9 (currently amended): The dart board cabinet as claimed in claim ~~8~~ 1, wherein said attaching ~~means~~ device includes at least one arm having a first end attached to said cabinet body, and a second end for supporting said at least one reference line generating device.

Claim 10 (original): The dart board cabinet as claimed in claim 9, wherein said at least one arm includes an extension laterally extended from said first end of said at least one arm, and secured to said cabinet body with at least one fastener.
